

Quintessential[®]

HERBICIDE

Control of 3-5 tiller smooth crabgrass in bermudagrass

Dr. Jim Brosnan, University of Tennessee

Trial objective

- To determine the efficacy of Quintessential[®] for controlling 3-5 tiller smooth crabgrass (*Digitaria ischaemum*) in bermudagrass-height lawns.

Materials and methods

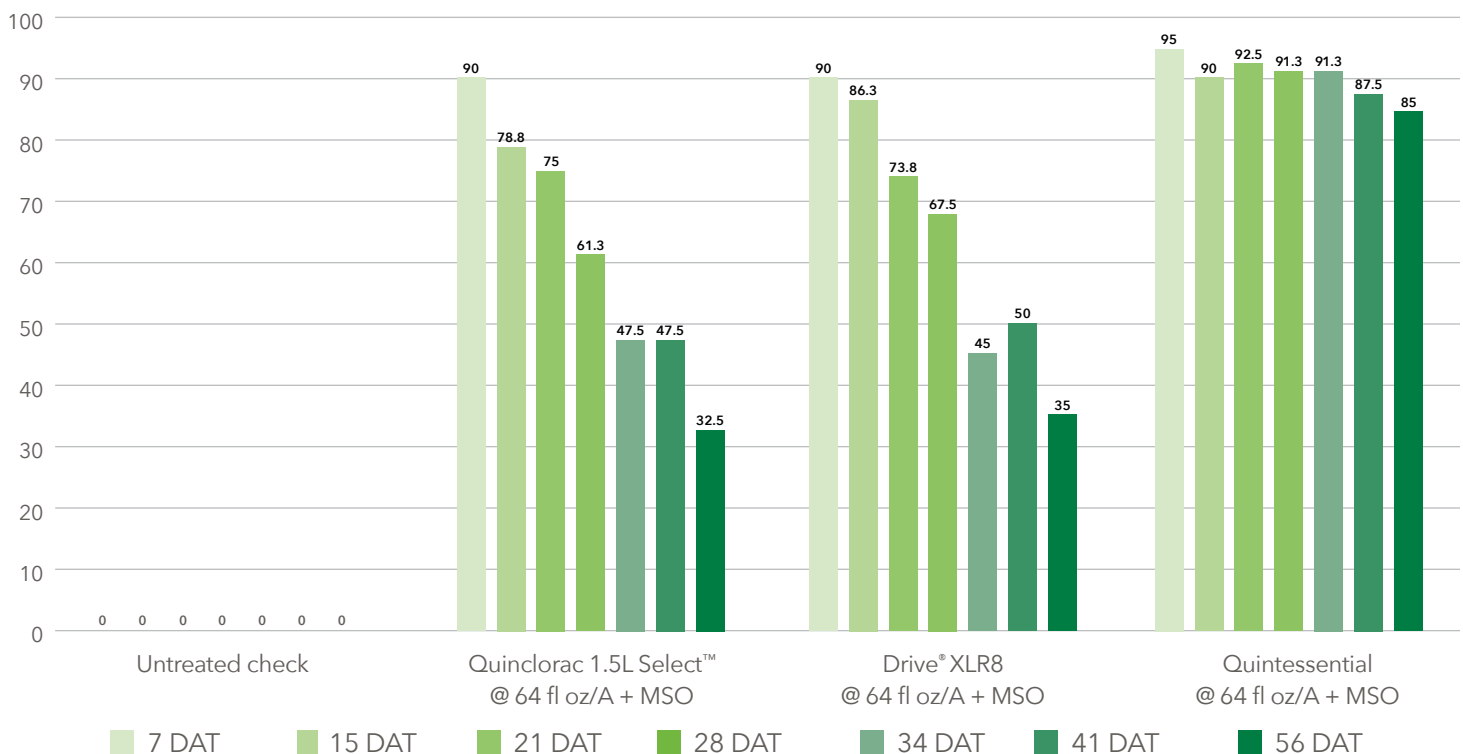

- Trial was initiated on April 7, 2019, through June 5, 2019, and was conducted at the Turfgrass Research Center (Knoxville, TN).
- The plots were arranged with four replications on bermudagrass turf.

- % Control of smooth crabgrass was recorded in each plot (0 = no control of crabgrass, 100 = complete control).

Trial results and conclusions

- Quintessential provided the highest level of control against other herbicides.
- The H-Value[®] Technology provided statistically superior control.
- Quintessential provided 90% control for more than a month.

% crabgrass control 3-5 tiller (University of Tennessee 2019)
